

CARPENTRY

Students in the carpentry program participate in a variety of projects throughout the year. Along the way, they gain the knowledge and skill necessary to safely perform a wide range of construction-related tasks. Course-work includes safety, blueprint reading, tools and materials, framing, interior and exterior finishing, roofing and more. Students are prepared for the National Center for Construction Education and Research (NCCER) CORE and Carpentry Level 1 certification. Several other industry recognized certifications are available.
